

# FLEXDRAIN® CSC/TS

Drainline heating cables for refrigeration

FLEXDRAIN® CSC/TS heating cables are easy to install and high-performing

- High flexibility
- Small bending radius
- Totally watertight
- Earth braid
- Silicone elastomer outer protective sleeve

# FLEXDRAIN® CSC/TS

Drainline heating cables for refrigeration

FLEXDRAIN® CSC/TS drainline heating cables are designed to be laid inside the defrost water flow pipes of refrigeration equipment installed in cold rooms. These heating cables operate only during defrost cycles. **Extremely flexible, they are totally sealed** and have a low energy consumption of 15 W/m. The range comprises of 5 standard references available from stock.

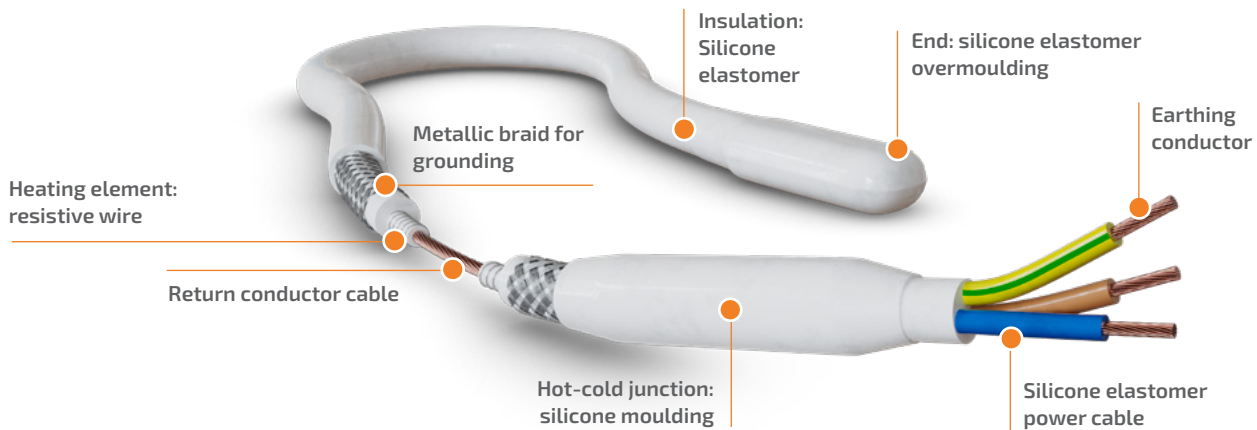

Our know-how and expertise in heating cable design enable us to **respond rapidly** to OEM applications, **integrating specific options** (thermostat, connector, adapted lengths, etc.).

## A complete range of certified products

	CSCTS/1/15-2	CSCTS/2/30-2	CSCTS/3/45-2	CSCTS/4/60-2	CSCTS/5/75-2
Heating length	1 m	2 m	3 m	4 m	5 m
Wattage*	15 W	30 W	45 W	60 W	75 W
Length of power cables	1 m				
Bending radius	35 mm				
Voltage**	230 V				

\* Power up to 50 W/m on request

\*\* Other voltages on request

A subsidiary of the OMERIN group with a dynamic **workforce of over 1,700**, FLEXELEC specializes in the design and manufacture of flexible heating cables and elements for temperature maintenance and frost protection of refrigeration systems.

**With over 40 years' experience**, FLEXELEC stands out for its innovation and development of products for a wide range of applications in the refrigeration industry.

**Our heating elements are critical to the smooth operation of equipment** installed in cold stores, refrigerated vehicles and supermarkets.
